
Course: **CS-465 AI-Lab**

16/02/2022

Fall 2021**Resource Person: Ahmad Farooq****Lab Test – 2**

Total Points: 15Time Allowed: 30 Minutes

Question-01**Marks: [5]**

Check if all elements in the tuple are the same.

tuple1 = (99, 99, 99, 99)**Question-02****Marks: [10]**

Write a class of **Dice** with appropriate attributes to build a small **Ludo Game**. Write a function **def roll_dice()** for getting random value for player. Write setter / getter / `__str__`, if necessary. Now let's create two dice for player-01 and player-02, roll the dice for both players once and then show the winner of the game.

Instructions:

1. Create a python file called **YouRollNumber.py** e.g., **14232432.py**
2. Submit python file only.

Note: No late submissions will be accepted.
